

Asmit Datta

Tempe, AZ | asmit77@icloud.com | asmit.space | github.com/sm11t | linkedin.com/in/asmitrajeet

EDUCATION

Arizona State University

B.S. in Computer Science, Minor in Business

Tempe, AZ

Aug 2022 – May 2026

EXPERIENCE

Software Engineer Intern

May 2025 – Jan 2026

My Yoga Teacher

San Diego, CA

- Architected a production **React Native** mobile app processing real-time biometric data for 10K+ users with 99.9% uptime, implementing offline-first architecture and **time-series deduplication** to ensure data integrity
- Engineered full-stack microservices using **React 19**, a **Go** API gateway, **Python FastAPI**, and **PostgreSQL**; built a voice-to-SQL pipeline with **OpenAI Whisper** and streaming LLM responses, reducing manual query effort by 60%
- Deployed containerized services via **CI/CD** on **AWS** using **Docker**; instrumented analytics tracking engagement, session metrics, and health insights, accelerating issue detection by 3×

Full-Stack Developer

Aug 2025 – Present

WatchDNA

Remote

- Developed an interactive map with **Mapbox GL JS**, custom markers, real-time filtering, and **JWT** authentication with role-based access control, enabling users to locate assets 30% faster
- Engineered a web-scraping system using **Python**, **BeautifulSoup**, and **Selenium** with rate limiting and schema validation, cutting manual data-collection time by 50% and increasing data accuracy

Software Engineer Intern

Feb 2024 – Nov 2024

Nexus AI Solutions

Bangalore, India

- Developed **TypeScript/Node.js** microservices with a RAG pipeline using **Pinecone** vector DB, semantic search, and **GPT-3.5/4** integration, achieving 40% latency reduction across 1M+ queries
- Built a real-time chat interface using **React 18**, **Socket.io**, and a **Flask-SocketIO** backend with bidirectional streaming, typing indicators, and CSV/XLSX export, improving team collaboration efficiency by 35%

PROJECTS

Pash | React, Tailwind, FastAPI, AWS S3, SQS, CUDA | asmit.space

Feb 2026

- Built a full-stack audio stem isolation platform using **React + Tailwind** and **FastAPI**, leveraging **Demucs v4** for AI-powered instrument separation with 5–10× faster processing via GPU workers
- Designed a decoupled cloud architecture with **AWS S3 + SQS**, implementing async job queueing, remote **CUDA** GPU offloading, and in-browser stem caching for instant track switching

Lead Engine | Python, FastAPI, React, Selenium, APScheduler

Feb 2026

- Built an autonomous AI lead agent using **Python**, **FastAPI**, and **React** that runs 24/7 scouts to discover, enrich, and score real estate leads from Zillow, Redfin, and county records
- Designed a multi-dimensional scoring algorithm (Motivation × Ability × Timeline) with an automated valuation model using comparable sales analysis, integrated with **Telegram** bot for real-time alerts

Lynti Mobility | React Native, Node.js, PostgreSQL, WebSocket, Google Maps API

Jan 2025

- Developed a consumer-facing mobile app for real-time transport with live driver tracking, route optimization, and sub-second ETA updates using **WebSocket** and cross-platform architecture
- Built **Node.js** backend with **PostgreSQL** for ride matching algorithms and location streaming; integrated **Google Maps APIs**, **Clerk** authentication, and payment foundations

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, SQL, Go, Java, C++, Rust

Frontend & Mobile: React, React Native, Tailwind CSS, NativeWind, Three.js, HTML/CSS

Backend & APIs: Node.js, Express.js, FastAPI, Flask, RESTful APIs, WebSocket, GraphQL

Databases & Cloud: PostgreSQL, MongoDB, Firebase, AWS (EC2, S3, Lambda, SQS), Docker, CI/CD

AI & Tools: Pinecone, LangChain, OpenAI, Selenium, Git, Mixpanel, DataDog, Agile
